## ANNOUNCEMENTS

### For Congress

We are authorized to announce  
**HON. J. W. HENSON**  
as a candidate for the Democratic  
nomination for Congress for the  
Second Congressional District,  
subject to the action of the primary  
to be held in August, 1914.

We are authorized to announce  
**HON. DAVID H. KINCHELOE,**  
of Hopkins county, as a candidate  
for Congress from the Second district,  
subject to action of the democratic  
primary August, 1914.

Let's have a sane Fourth.

If the weather clerk will keep this  
up and send us a good rain once a  
week the past will be forgiven.

Leonard Armstrong, 12, of Hick-  
man, was killed Monday afternoon  
by Bert Gerard, of Warren county.  
Both were inmates of the State Re-  
form School.

Greece has called out naval re-  
serves to meet the demands for blue-  
jackets that will follow acquisition of  
two American battleships, and ar-  
rangements for the transfer are be-  
ing made.

Prof. J. M. Labaye, a French  
scientist, says brain work is more  
fatiguing than physical labor, be-  
cause it calls for more blood pressure.  
Perhaps this explains why so many  
people do not use brains.

United States Senator Hoke Smith,  
of Georgia, has been notified that he  
is a grandfather. Twins daughters  
have been born to Mr. and Mrs. Ma-  
rion Smith, of Atlanta. The father  
is Senator Smith's only son.

Win. C. Walters, who was given a  
life sentence on a charge of kidnap-  
ing Robert Dunbar, has been re-  
leased by the Louisiana Supreme  
Court, which held invalid the law  
under which he was convicted.

Dr. H. W. Wiley, the pure food  
expert, seems to have waited a long  
time and then married a suffragette.  
Mrs. Wiley headed the delegation  
that called on President Wilson in  
the interest of female suffrage.

The Coroner's investigation into  
the death of Waldo R. Ballou, at  
Stamford, Conn., is being laid,  
pending the analysis of blood stains  
on certain exhibits. Mrs. Angie, on  
whom suspicion falls, is at liberty  
under a \$5,000 bond.

With the aid of \$150,000 appropri-  
ated by the Legislature New Orleans  
hopes to be able to stamp out the  
bubonic plague, two cases of which  
have been found in the city. New  
York has declared a quarantine  
against all vessels sailing from the  
Southern port.

Eighteen persons, including  
Charles S. Mellen, former president  
of the New York, New Haven &  
Hartford, were indicted in Cam-  
bridge on various charges in connec-  
tion with the financing of the Hamp-  
den railroad from Bondsville to  
Springfield, Mass.

The toeless shoe for afternoon and  
evening wear and to be worn with  
or without stockings is the latest  
novelty for women to appear in the  
London shops. The new design is  
of sandal form with high French  
heels, and exposes glimpses of the  
sides of the foot and toes. It is also  
made in a range of colors, with a  
view to matching the addition to  
board and lodging range. So far  
the new shoe has not yet made its  
appearance in the street or the fash-

## HOW TO USE ANTI-HOG-CHOLERA SERUM

Injecting Cholera Serum Into Hog.

(Prepared by the United States Depart-  
ment of Agriculture.)

At a recent conference of federal  
and state officials in charge of hog-  
cholera work the methods of applying  
the cholera serum in practise were  
considered. There are two methods.  
In one the serum alone is used, pro-  
ducing immunity lasting from 30 to 90  
days; in the other the virus of hog  
cholera and the serum are injected  
simultaneously—that is, virus at one  
point and serum at another. This lat-  
ter is known as the "simultaneous  
method" and will produce active or  
lasting immunity. If the serum used  
in this simultaneous treatment is not  
good, or if the mode of application is  
faulty, disease may be set up in the  
treated herd. For this reason it was  
the general consensus of opinion at  
the conference that the simultaneous  
method should be used only by those  
who have had special training, and it  
was agreed that the ideal arrangement  
would be to allow its use only by fed-  
eral and state veterinary officers.

The serum-alone treatment, on the  
other hand, may be given by anyone  
without danger of causing hog cholera.  
If the serum is good the farmer may  
give it to his hogs without fear, pro-  
vided it is administered in the proper  
way. While it would no doubt be  
best to have even the serum alone al-  
ways administered by a skilled agent,  
farmers may obtain good results if  
proper care is used. The farmer  
should remember that the serum-alone  
treatment is very different from the  
simultaneous treatment. The follow-  
ing advice regarding the use of serum  
is offered for farmers who cannot ob-  
tain the services of a skilled agent:  
All serum cannot be depended upon  
and farmers are cautioned against put-  
ting implicit confidence in a serum  
merely because it is labeled "Anti-Hog-  
Cholera." The serum must be pre-  
pared right in order to protect hogs.  
Farmers should use every effort to get  
a good reliable serum from the state  
college or from a reliable dealer.

Anti-hog-cholera serum is most effec-  
tive when used as a preventive. It  
will also cure a large number of hogs  
in the early stages of the disease. It  
is of much less value, however, for  
hogs that are visibly sick. The far-  
mer should make careful preparations

receptacle and cover having been ster-  
ilized by boiling in water before use.  
The glass should be allowed to cool  
before the serum is poured into it, and  
should be always covered except when  
serum is being taken from it.

The serum is injected directly into  
the tissues on the inner side of the  
thigh or, better, into the loose tissues  
between the foreleg and the body. The  
needle is inserted into the skin per-  
pendicularly to a depth of from one-  
half to 1 inch, depending upon the size  
of the hog. Before the injection is  
made the skin of the hog over the  
point selected for injection should be  
thoroughly cleansed by washing with  
soap and water, and the surface then

Last Stages of Cholera.

scrubbed with some reliable disinfect-  
ant, such as compound solution of  
resol (U. S. P.). This disinfectant  
can be procured at drug stores, and  
should be diluted before use by adding  
one part of it to 30 parts of soft water.  
Care should be used in estimating  
the weight of hogs, because the amount  
of serum required depends upon the  
size of the hog injected.

The usual dose is commonly given  
on the package in which the serum  
comes. Be careful not to underesti-  
mate. Overestimate rather than un-  
derestimate, and thereby be sure of  
giving an ample dose of serum. After  
the injections are made, the hogs  
should be turned into a clean yard,  
free from mud holes and excessive  
dust. The hogs should be kept in this  
inclosure for several days at least  
after the injection, to enable the punc-  
ture wounds to heal thoroughly. They  
should be given soft, easily digested  
food.

Every farmer should keep an accu-  
rate record of the injections he makes,  
so that he will know what success has  
attended the treatment. He should  
make a record of the number of hogs  
that died from hog cholera before  
treatment, the number sick and the  
number apparently well at the time  
of treatment, and he should later keep  
a record of the number of sick and  
well ones that died following treat-  
ment. Keeping these records may en-  
able him to determine whether or not  
the serum he used was good, and it  
may show whether or not the work  
was properly done. If any hogs de-  
velop abscesses at the point of injec-  
tion, a note should be made of the  
fact, keeping account of the number.  
Abscesses indicate that the serum was  
not right or that the work was not  
properly done.

Every farmer should make absolute-  
ly certain that no dirt or implement  
is brought from an infected hog lot in-  
to another hog lot. Hog cholera can  
be carried in dirt on shoes, on wagon  
wheels, or on the feet of dogs. It has  
been proved that a pen of hogs in-  
fected with hog cholera can be kept  
within 10 feet of a well herd without  
communicating the disease, provided  
no dirt or implement or other object  
is moved from the former to the lat-  
ter pen. If, however, the pen with the  
uninfected hogs should be cleaned  
with a hoe or shovel that has been  
used in the infected pen, the well  
herd would be almost certain to get  
the disease. Dogs, crows, and buzz-  
ards can transport particles of flesh  
from dead hogs and thus carry the  
disease.

First Stages of Cholera.

## She Broke Down Entirely.

Lantz, W. Va.—Mrs. Tobe Talbott,  
of this place, says: "I had been trou-  
bled with womanly ailments for some  
time, and at last I broke down en-  
tirely. I got so weak I could scarce-  
ly walk across the room. Thanks to  
Cardui, I improved right off. Now I  
do my housework, and am feeling  
well." During the past 50 years,  
more than a million women have  
been benefited by taking Cardui.  
You must believe that Cardui will  
help you, too, since it helped all  
these others. Cardui is a safe harm-  
less, vegetable remedy, of positive,  
curative merit, for women. At drug  
stores. Try one bottle. It will sure-  
ly help you.

## "John" the Favorite.

A French journal has been dig-  
ging into the soul of the young girl,  
asking her what she wants in a hus-  
band as to color, age and name. The  
vast majority of 50,000 reply that they  
want a dark man of twenty-seven, and  
his name should be the French equiva-  
lent of John. None of your Alger-  
nons or Erics for the cautious damsel.  
None of your Hippolytes or Pauls—  
mercurial or subversive persons. They  
want John when it comes to hus-  
bands.

## How To Give Quinine To Children.

FEBRILINE is the trade-mark name given to an  
improved Quinine. It is a Tasteless Syrup, pleas-  
ant to take and does not disturb the stomach.  
Children take it and never know it is Quinine.  
Also especially adapted to adults who cannot  
take ordinary Quinine. Does not nauseate nor  
cause nervousness nor ringing in the head. Try  
it the next time you need Quinine for any pur-  
pose. Ask for 2-ounce original package. The  
name FEBRILINE is blown in bottle. 25 cents.

**3 IN ONE OILS.**  
CLEANS, POLISHES,  
PREVENTS RUST.

This is a light, pure oil com-  
pound that never gums. It lubricates  
perfectly sewing machines, typewriters, bicycles, clocks,  
guns, lawnmowers—everything that ever needs oil. It is  
office. No grease. No dirt. A little Shell-Oil on a ball bearing  
sprinkled on a yard of black cloth will make it shine like  
Satin. It absolutely prevents rust on gun barrels, on  
hardware, on ranges, on everything metal, indoors or out. It fits into  
the narrow metal pores and forms a protecting "seal" which stays on  
forever. It is the only oil for gun barrels. Write today for free folder and the  
Shell-Oil Dictionary of hundreds of uses. In 3-cent bottles, 10¢ (1 oz.), 25¢ (3 oz.),  
50¢ (6 oz.), 75¢ (12 oz.), 1.00 (16 oz.). Also in new patented Handy Oil Can, 25¢ (3 1/2 oz.).
